Nature's most potent, versatile antibiotic and healing agent

Each veggie-cap contains:

- 270 mg stabilized Allicin from fresh Garlic
- 60 mg food-based Vitamin C
- 40 mg citrus bioflavonoids

Alli-C safely kills harmful pathogens better than any known substance while promoting disease reversal and good health

- British biochemist Peter Josling recently developed a way to stabilize the Allicin from Garlic for the first time in history and incorporated it into his flagship product **Alli-C**. That means you, your family, and your pets now have available the microbe-destroying and healing power of Garlic multiplied many times over. One tiny capsule of **Alli-C** gives the equivalent health benefits of eating 36 cloves of fresh raw Garlic.
- **Alli-C** causes **no odor** for you or those close to you to deal with.
- Each **Alli-C** capsule provides 270 mg pure stabilized Allicin from Garlic along with 60 mg Vitamin C and 40 mg citrus bioflavonoids. This combination has been scientifically proven lethal to over 300 strains of MRSA, VRSA, and other bacteria that are resistant to prescription drugs. The stabilized Allicin in **Alli-C** is the strongest and safest natural antibiotic known to man. **Alli-C** kills all types of disease-causing bacteria in you, your family, and your animals without harming friendly bacteria or causing negative side-effects.
- **Alli-C** is also strongly anti-viral, anti-fungal, and anti-parasitic. It has been scientifically proven in double-blind studies to reduce the number, severity, and duration of common colds. It fights all types of diseases caused by harmful microbes.
- **Alli-C** can help lower high blood pressure and high cholesterol.
- **Alli-C** can help ease arthritic pain and swelling.
- **Alli-C** can be harmful to cancer cells.
- People and animals taking **Alli-C** are less apt to be bitten by mosquitoes, fleas, and ticks.
- **Alli-C** is not Garlic or a Garlic supplement, but rather makes all Garlic supplements obsolete.
- **Alli-C** may be taken by children ages 3 and up as well as pets. **Alli-C** is safe in virtually any quantity. The only ones who should not take **Alli-C** are children under 3 years of age and those allergic to Garlic.
- The normal maintenance dose of **Alli-C** for an adult is one capsule per day, but higher amounts may be safely taken for therapeutic purposes. Each bottle of **Alli-C** contains 30 capsules for a normal one-month supply.
- **Alli-C** is made and packaged with pharmaceutical grade materials and grown to GRAS (Generally Recognized As Safe) agricultural standards. There is no real need to spray Garlic with pesticides since nothing attacks it, so the Garlic used to make **Alli-C** is pesticide-free.
- **Alli-C** gives you more Allicin for your money than other Allicin-based products. Every kitchen cabinet in the world should contain some **Alli-C**.

Contact your Garlic Rx representative for more information and ordering **Alli-C**. Ask about new **Alliderm** gel for topical applications.
